DETAILED ACTION

Drawings

The drawings are objected to because the application only has copies of Figs 1a-1d and 6-8. It is asked that with the response to this Restriction Requirement applicant provide a copy of all the figures so they can be entered into the file. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 13-28, drawn to a method, classified in class 604, subclass 506.
- II. Claims 2-12, 29-75, 76-82 and 90-91, drawn to an apparatus, classified in class 604, subclass 523.
- III. Claims 83-89, drawn to an apparatus, classified in class 604, subclass 95.04.

The inventions are distinct, each from the other because of the following reasons:

Inventions I or II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the sheath could be used alone with no steering apparatus or with any guidewire type apparatus that does not require a handle. The subcombination has separate utility such as a

Art Unit: 3763

shaping tool for other conduits that are not used in the body (i.e. general plastic fluid piping for bathrooms, fish tanks, and other water systems).

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method can be performed with a device that does not require a shaping tool.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

If applicant elects Group II, a further election of species is required. This application contains claims directed to the following patentably distinct species of the claimed invention:

- a. Figs 1a-1d,
- b. Figs 2-3,
- c. Fig 4,
- d. Fig 5,
- e. Fig 6, and
- f. Fig 7.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are considered generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
